

Before you quote a player-prop record

Record / page URL:

Date checked: _____ Unit counted: _____

Identity: player / event / stat / direction / line / book

1. What was counted?

Results distinguishes raw analysis rows from collapsed public entries.

2. When was it recorded or published?

A sample Date is not proof of pre-event publication. Check both clocks.

3. Is it the same event and line?

Match the identity fields above. A result from another event cannot grade it.

4. How are push and unresolved outcomes treated?

Pushes stay separate. An unresolved event has no final outcome.

5. Which rows and evidence are excluded or missing?

Check repeats, missing publication times, price/payout gaps and eligibility.

An unknown date or missing final stat stays unknown.

Past results do not guarantee future outcomes.
